INTRODUCTORY.

Patents do not receive the liberal construction by the courts which was accorded a few years ago. This is within the experience of every practitioner whose practice takes in a number of circuits.

The Patent Office, following the courts, refuses to grant patents for small improvements. The objection that an alleged improvement is a "mere mechanical expedient not involving invention" is now often raised against devices which a few years ago would have been patented without objection.

The manufacturer who knows that his wares are better than similar goods made by others believes there must be some reason for it. He thinks he is entitled to recognition for the improvement he has made. This recognition he finds it more and more difficult to get by means of the patent law, although the statute has not been changed in any important particular for more than thirty years.

While the courts have been restricting patents, they have come to recognize more clearly the right of the honest producer to his business reputation, and the duty of the Government to protect the people from fraud. Hence trade-mark protection has grown more valuable, and there is a very evident disposition in the courts to protect this class of property.

The writer, who has devoted more than twenty years to patent practice, as an examiner in the U. S. Patent Office, and as a practitioner before the Office and expert in the courts, has of late been constrained to advise many clients to devote less attention to patents for minor improvements, and more to maintaining their business reputation, as they may do under the trade-mark law.

In England the value of trade-mark protection, under the "Statute of Monopolies," has long been recognized. More than five times as many marks are registered in England as in the United States. The importance of trade-mark protection is not yet fully realized in America.

Most American manufacturers have some distinguishing mark by which their goods are known. Too often they are careless about the use of their marks, or about infringement.

In adopting a new mark the manufacturer should be careful that it is original, appropriate, and not too nearly like that of a competitor.

When a mark has been long used, the owner should insist that no other dealer use one so near like it as to deceive.

The following compilation has been made to enable manufacturers and dealers in machines, metals, and hardware and analogous trades to know the relation they bear toward each other in the matter of the marking of their goods.

My thanks are due to the examiner of the class of trade-marks, and his assistants in the Patent Office, for their courtesy and kind suggestions during the progress of this work, which, small as it seems, required a vast amount of research, comparison, and investigation.

The essential features of the trade-mark have been given in the compilation. The intention is to make the work a key, or ready reference index. The Patent Office furnishes a copy of any trade-mark for ten cents, so that, having found the lead, further information in any case need not be expensive.

W. A. BARTLETT.

TRADE-MARKS.

THE LAW AND PRACTICE.

A trade-mark is a symbol which indicates the origin of goods, wares, or merchandise, and distinguishes these goods from others not marked or otherwise marked.

The right of possession in a trade-mark is a natural right, founded on the inherent principle of justice which gives to the producer that which he produces. The courts recognize trade-marks as property, and trade-marks may be protected at law or in equity in the same manner as other property.

The United States statutes give special protection to trade-marks registered in the United States Patent Office, under the provisions of the act of March 3, 1881, which act is as follows:

AN ACT to authorize the registration of trade-marks and protect the same.

Be it enacted by the Senate and House of Representatives of the United States in Congress assembled, That the owners of trade-marks used in commerce with foreign nations or with the Indian tribes, provided such owners shall be domiciled in the United States or located in any foreign country or tribes, which, by treaty, convention, or law, affords similar privileges to citizens of the United States, may obtain registration of such trade-marks by complying with the following requirements:

First. By causing to be recorded in the Patent Office a statement specifying name, domicile, location, and citizenship of the party applying; the class of merchandise, and the particular description of goods comprised in such class to which the particular trade-mark has been appropriated; a description of the trade-mark itself, with fac-similes thereof, and a statement of the mode in which the same is applied and affixed to goods, and the length of time during which the trade-mark has been used.

Second. By paying into the Treasury of the United States the sum of twenty-five dollars, and complying with such regulations as may be prescribed by the Commissioner of Patents.

SEC. 2. That the application prescribed in the foregoing section must, in order to create any right whatever in favor of the party filing it, be accompanied by a written declaration verified by the person, or by a member of a firm, or by an officer of a corporation applying, to the effect that such party has at the time a right to the use of the trade-mark sought to be registered, and that no other person, firm, or corporation has the right to such use, either in the identical

form or in any such near resemblance thereto as might be calculated to deceive; that such trade-mark is used in commerce with foreign nations or Indian tribes, as above indicated; and that the description and fac-similes presented for registry truly represent the trade-mark sought to be registered.

SEC. 3. That the time of the receipt of any such application shall be noted and recorded. But no alleged trade-mark shall be registered unless the same appear to be lawfully used as such by the applicant in foreign commerce or commerce with Indian tribes, as above mentioned, or is within the provision of a treaty, convention, or declaration with a foreign power; nor which is merely the name of the applicant; nor which is identical with a registered or known trade-mark owned by another, and appropriate to the same class of merchandise, or which so nearly resembles some other person's lawful trade-mark as to be likely to cause confusion or mistake in the mind of the public, or to deceive purchasers. In an application for registration the Commissioner of Patents shall decide the presumptive lawfulness of claim to the alleged trade-mark; and in any dispute between an applicant and a previous registrant, or between applicants, he shall follow, so far as the same may be applicable, the practice of courts of equity of the United States in analogous cases.

SEC. 4. That certificates of registry of trade-marks shall be issued in the name of the United States of America, under the seal of the Department of the Interior, and shall be signed by the Commissioner of Patents, and a record thereof, together with printed copies of the specifications, shall be kept in books for that purpose. Copies of trade-marks and of statements and declarations filed therewith, and certificates of registry so signed and sealed shall be evidence in any suit in which such trade-marks shall be brought in controversy.

SEC. 5. That a certificate of registry shall remain in force for thirty years from its date, except in cases where the trade-mark is claimed for and applied to articles not manufactured in this country, and in which it receives protection under the laws of a foreign country for a shorter period, in which case it shall cease to have any force in this country by virtue of this act at the time that such trade-mark ceases to be exclusive property elsewhere. At any time during the six months prior to the expiration of the term of thirty years such registration may be renewed on the same terms and for a like period.

SEC. 6. That applicants for registration under this act shall be credited for any fee or part of a fee heretofore paid into the Treasury of the United States with intent to procure protection for the same trade-mark.

SEC. 7. That registration of a trade-mark shall be *prima facie* evidence of ownership. Any person who shall reproduce, counterfeit, copy, or colorably imitate any trade-mark registered under this act and affix the same to merchandise of substantially the same descriptive properties as those described in the registration shall be liable to an action on the case for damages for the wrongful use of said trade-mark at the suit of the owner thereof; and the party aggrieved shall also have his remedy according to the course of equity to enjoin the wrongful use of such trade-mark used in foreign commerce or commerce with Indian tribes, as aforesaid, and to recover compensation therefor in any court having jurisdiction over the person guilty of such wrongful act; and courts of the United States shall have original and appellate jurisdiction in such cases without regard to the amount in controversy.

Sec. 8. That no action or suit shall be maintained under the provisions of this act in any case when the trade-mark is used in any unlawful business or upon any article injurious in itself, or which mark has been used with the design of deceiving the public in the purchase of merchandise, or under any certificate of registry fraudulently obtained.

Sec. 9. That any person who shall procure the registry of a trade-mark, or of himself as the owner of a trade-mark, or an entry respecting a trade-mark, in the office of the Commissioner of Patents, by a false or fraudulent representation or declaration, orally or in writing, or by any fraudulent means, shall be liable to pay any damages sustained in consequence thereof to the injured party, to be recovered in an action on the case.

Sec. 10. That nothing in this act shall prevent, lessen, impeach, or avoid any remedy at law or in equity which any party aggrieved by any wrongful use of any trade-mark might have had if the provisions of this act had not been passed.

Sec. 11. That nothing in this act shall be construed as unfavorably affecting a claim to a trade-mark after the term of registration shall have expired; nor to give cognizance to any court of the United States in an action or suit between citizens of the same State, unless the trade-mark in controversy is used on goods intended to be transported to a foreign country, or in lawful commercial intercourse with an Indian tribe.

Sec. 12. That the Commissioner of Patents is authorized to make rules and regulations and prescribe forms for the transfer of the right to use trade-marks and for recording such transfers in his office.

Sec. 13. That citizens and residents of this country wishing the protection of trade-marks in any foreign country, the laws of which require registration here as a condition precedent to getting such protection there, may register their trade-marks for that purpose as is above allowed to foreigners, and have certificate thereof from the Patent Office.

Approved March 3, 1881.

Also act of August 5, 1882, as follows :

AN ACT relating to the registration of trade-marks.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That nothing contained in the law entitled "An act to authorize the registration of trade-marks and protect the same," approved March third, eighteen hundred and eighty-one, shall prevent the registry of any lawful trade-mark rightfully used by the applicant in foreign commerce or commerce with Indian tribes at the time of the passage of said act.

Approved August 5, 1882.

Under the provisions of the act of October 1, 1890, goods bearing infringing trade-marks are absolutely excluded from importation. The following circular from the Treasury Department explains the nature of the proceedings necessary to secure such protection :

TREASURY DEPARTMENT.

OFFICE OF THE SECRETARY,

*Washington, D. C., October 31, 1890.**To Officers of the Customs and Others:*

The circular of the 10th instant, No. 92, concerning "trade-marks," is hereby withdrawn, and in lieu thereof the following is prescribed:

The attention of officers of the customs and others is invited to the following provision of section 7 of the act of October 1, 1890, viz:

"SECTION 7. That on and after March first, eighteen hundred and ninety-one, no article of imported merchandise which shall copy or simulate the name or trade-mark of any domestic manufacture or manufacturer shall be admitted to entry at any custom-house of the United States. And in order to aid the officers of the customs in enforcing this prohibition, any domestic manufacturer who has adopted trade-marks may require his name and residence and a description of his trade-marks to be recorded in books which shall be kept for that purpose in the Department of the Treasury, under such regulations as the Secretary of the Treasury shall prescribe, and may furnish to the Department fac-similes of such trade-marks; and thereupon the Secretary of the Treasury shall cause one or more copies of the same to be transmitted to each collector or other proper officer of the customs."

Applications for the recording of names or trade-marks in this Department will mention the name and residence of the domestic manufacturer, and furnish a description of the mark and the names of the ports to which the fac-similes should be sent. No such name or trade-mark will be received unless accompanied by the proper proof of ownership, which must consist of the affidavit of the owner or one of the owners, certified by a notary public or other officer entitled to administer oaths and having a seal.

On the receipt by a customs officer of any such fac-similes, with information from the Department that they have been recorded therein, he will properly record and file them, and will exercise care to prevent the entry at the custom-house of any article of foreign manufacture copying or simulating such mark.

No fees are charged for recording trade-marks in the Department and custom-houses.

A sufficient number of fac-similes should be forwarded to enable the Department to send one copy to each port named in the application.

O. L. SPAULDING,

Assistant Secretary.

The acts of July 8, 1870, and August 14, 1876, gave original jurisdiction to the federal courts in matters of registered trade-marks used in domestic commerce. This law was declared unconstitutional by the Supreme Court in 1879 (Trade-Mark Cases, 10 Otto, 82).

As the purpose of a trade-mark is merely to distinguish the origin of the goods, it should properly be a mere mark or symbol. A trade-mark should not be a description of the goods, as any other person has a right to describe his goods in suitable terms.

A trade-mark should not be merely the name of the manufacturer, as another man of the same name cannot generally be prevented from using his name in connection with his wares.

A trade-mark should not be merely the name of the town in which the goods are made, as others in the same town might have a right to use it, or others in another town of the same name.

There have been exceptions to these general rules, and courts have sustained trade-marks which consisted of a firm name (*Rogers Co. v. Rogers & Spur Co.*, 11 Fed. Rep. 495), or geographical name (*Blackwell v. Dibrell*, 3 Hughes, 151), on the ground that long use of such a mark gave vested right; or that the infringement of such a mark was calculated to deceive or injure the public.

As a general rule, the longer a trade-mark has been in use, the better title has the owner of such mark; and in seeking to register a trade-mark, the length of use is in favor of the applicant.

There is no rule of law precluding the use of an elaborate picture or engraving, or a lengthy treatise, or a chapter of the Bible or of the Revised Statutes, as a trade-mark. But as the very elaboration is apt to defeat its object; a simple figure, word, letter, phrase, or symbol is generally preferred for a trade-mark.

In registering a trade-mark in the U. S. Patent Office the applicant is required to state the essential feature of the trade-mark. He may also show and describe matters which may be used alternatively as part of the mark. In the compendium hereto attached it is intended to give only the essential feature of the trade-mark in each case.

Before a trade-mark can be registered the applicant is required to state the class of merchandise to which the mark applies, and the particular description of goods to which the mark has been appropriated. (Sec. 1, law of 1881.)

Trade-marks registered under the old law, declared unconstitutional, can be re-registered to the same parties without additional fee. (Sec. 6, act of 1881.)

Transfers of trade-marks may be recorded in the Patent Office, but the record of transfers is not compulsory.

A trade-mark need not be an original device or design. It need only be exclusive in its application to the particular goods of the maker or dealer.

A happy selection of a word or phrase frequently gives great value to a mark, in a business way. Thus "Phonograph" is a name to which proprietary rights attach. "He pays the freight" is not only an advertising catch phrase, but an excellent trade-mark. The mark

I X L, used to distinguish certain lines of goods, has become valuable in such connection.

The registration of a trade-mark is *prima facie* evidence of ownership, and infringement by colorable imitation gives the owner the right to proceed in equity against the infringer.

Trade-marks do not apply to mere abstractions. A man may not register a trade-mark which is not used on some article of merchandise, nor even for a proposed future use of a mark on merchandise. Use only gives right to monopoly.

In filing trade-marks for registration the Patent Office now requires that a facsimile be furnished on card-board, 10 x 15 inches in size, with an inch margin, the mark being executed in black, so that photolithographic copies may be produced.

Note, that the term of a trade-mark is thirty years, and that it may be extended for a second similar term.

In the Patent Office, trade-marks are classified in 77 classes. This classification is artificial, but the best now existing.

The intention of the present compilation is to present such marks as are used in the machine, metal, and hardware trades, and on articles or devices closely connected to the machine, metal, hardware, jewelry, or carriage trades. Where marks are marginal or are applied to several classes of goods, the designation will generally give a sufficient indication as to the particular line of goods to which the mark applies.

Following the Patent Office classification, and excluding other lines of trade, the following index gives the general outline of the marks herein presented :

INDEX OF CLASSES.

- Agricultural Implements** (Class 1) includes machines and tools used on the farm and plantation.
- Cleaning and Polishing Metal** (Class 12) includes, also, grinding implements and devices.
- Cutlery and Edge Tools** (Class 17) includes most cutting implements and flat table-ware.
- Fire-arms** (Class 24) includes, also, ammunition, explosives, torpedoes, and the like.
- Household Articles** (Class 32) includes refrigerators, coolers, and devices analogous thereto.
- Iron and Steel** (Class 34) includes, also, metals and alloys in early manufactured stages.
- Jewelry and Plated Ware** (Class 35) includes, also, ornamental articles of metal.
- Lamps and Lanterns** (Class 36) includes the metallic parts of lighting devices, but excludes glass.
- Laundry Articles** (Class 38) includes washing machines, wringers, &c., (not soaps or chemicals).
- Locks and Hardware** (Class 40) includes miscellaneous hardware not otherwise classified.
- Machines** (Class 41) embraces steam-engines, textile, paper, metal, and wood working machines, and generally machines not otherwise classified.
- Needles and Pins** (Class 47) includes, also, safety-pins, needle-threaders, &c.
- Machine Packing** (Class 50) includes, also, belting, hose, boiler coverings, and the like.
- Sewing Machines and Attachments** (Class 58) embraces, also, parts of such machines.
- Stoves and Heaters** (Class 66) embraces, also, parts of stoves, furnaces, &c.
- Surgical Implements** (Class 68) includes, also, electrical appliances, many but not all being used in surgery.
- Time-keeping Instruments** (Class 70) includes clocks and watches, &c., and parts thereof.
- Vehicles** (Class 76) includes carriages, wagons, sleighs, cycles, cars, &c.

PATENTS.

United States patents are granted for four things only: Arts, machines, manufactures, and compositions of matter.

An art, under the patent practice, is generally a process or method of doing something. It may be a chemical process.

A machine is an assemblage of mechanical elements, and is generally intended to work on other material.

A manufacture is a thing ready for use.

A composition of matter is something made up of more than one element.

To be patentable, invention must have been employed in the production of any one of these patentable things, and the thing must be useful.

A design patent applies only to the ornamentation of manufactures (made things).

The Government fee on filing an application for patent is \$15; after allowance, but before issue of the patent, \$20 additional; total \$35. Patents run 17 years from date of issue.

The Government fee for a design is \$10, \$15, or \$30, according to the term desired ($3\frac{1}{2}$, 7, or 14 years).

Patents are granted in most foreign countries to citizens of the United States on the same terms as to their own citizens.

In most foreign countries there is an annual tax on all patents. There is no such tax in the United States.

A caveat is a partial disclosure of an invention admitted to be incomplete. It is therefore not reliable evidence of the completion of an invention.

COPYRIGHTS.

A trade-mark cannot be registered by the Librarian of Congress under the Copyright Law, as was formerly done. Copyrights apply only to books, maps, charts, dramatic and musical compositions, or works of the fine arts, such as engraving, painting, statuary, &c.

The printed title or description of a copyrighted work must be filed with the Librarian of Congress before publication of the work. Two copies of the book, map, or similar subject of copyright must be delivered or mailed to the Librarian of Congress not later than the day of publication, under penalty of fine.

The Government fee for recording a copyright claim is fifty cents, and fifty cents additional for a copy of the record.

No copyright is valid unless notice is given by inserting in each copy of the publication the notice prescribed by law.

The term of a copyright is twenty-eight years, and it may be extended for fourteen years, by a proper showing made during the last six months of the original term.

Copyrights are assignable, and the assignment must be recorded with the Librarian of Congress.

Citizens of foreign countries which extend the benefit of their copyright laws to citizens of the United States on the same terms as to their own citizens may obtain copyright protection in the United States.

The copyright law does not cover prints and labels nor inventions in the mechanic arts.

PRINTS AND LABELS.

Under the act of June 18, 1874, owners of prints and labels may register the same in the Patent Office on payment of the fee of \$6.

A label is construed to be a device or representation borne by a vendible commodity. A print is a device not borne by such commodity, but in some way relating thereto (*e. g.*, as an advertisement thereof).

A label cannot be registered in the Patent office, if it bear a device capable of sequestration as a trade-mark, until after the registration of such device as a trade-mark.

A label proper is generally the description of the goods or wares to which the label is applied, and may contain directions for preparation, production or use.

The statute provides no specific remedy in case of the infringement of a registered print or label. It is believed that the law will soon be amended in this particular.

The prints referred to in the act relating to prints and labels differ from the prints referred to in the copyright law, in that the latter are supposed to be purely esthetic, and to have no connection with mere trade, while the former are based entirely on considerations of trade, although artistic excellence is not prohibited.

TRADE-MARKS

FOR

AGRICULTURAL IMPLEMENTS.

(CLASS 1.)

Embracing machines and implements used in tillage, harvesting and curing crops, such as plows, harrows, diggers, mowers, reapers, thrashers, scythes, rakes, hoes and spades, cotton pickers and gins, and the like. (See also Class 17, Cutlery and Edge Tools; Class 40, Locks and Hardware; Class 41, Machines; Class 73, Tools and Devices.)

EXPONENT OF THE STOVE, HARDWARE, AND HOUSE-FURNISHING
GOODS TRADES.

To Manufacturers of Stove, Hardware,

and House-Furnishing Goods :

Unproved assertions of bombastic advertising solicitors avail
not. If any journal has as many paid subscribers as the
American Artisan, why not furnish the proofs? Our books
are open for inspection, and prove that the American Artisan
has a larger bona-fide circulation among paid subscribers than
any other journal representing similar trade interests.

FORM OF STATEMENT.

The following is the usual form of statement employed in registering a trade-mark under the present law:

To all whom it may concern :

Be it known that — — —, a citizen of — — —, residing at — — —, and doing business at No. — — —, — — — street, in — — —, have adopted for — — — use a trade-mark for — — —, of which the following is a full, clear, and exact specification.

Said trade-mark consists of the word Champion, and the representation of a Maltese Cross. This has generally been arranged as shown in the accompanying facsimile, in which the word Champion is printed in plain capital letters across the face of the representation of the maltese cross. But the style of lettering and the special arrangement thereof are unimportant, and may be changed at pleasure without materially affecting the character of the trade-mark, the essential feature of which is the word Champion and the representation of the Maltese Cross.

This trade-mark — — — have used continuously in — — — business since about — — —.

The class of merchandise to which this trade-mark is appropriated is — — —, and the particular description of goods comprised in said class on which — — — use it is — — —.

It is — — — practice to apply said trade-mark to the goods by printing the same on the labels which are attached to the goods, but the mark may be branded or stenciled on, or otherwise applied to the goods or to the packages in which they are contained, or otherwise legitimately used in connection with — — — business.

(Signed) — — —.

FORM OF DECLARATION.

(TO ACCOMPANY STATEMENT.)

STATE OF ———, }
County of ———, } ss.:

———, being duly sworn, states that ——— is the applicant named in the foregoing statement; that he verily believes that the foregoing statement is true; that said applicant at this time has a right to the use of the trade-mark therein described; that no other person, firm, or corporation has the right to such use, either in the identical form or in any such near resemblance thereto as might be calculated to deceive; that it is used by ——— in commerce between the United States and foreign nations or Indian tribes, and particularly with ———, and that the description and facsimile presented for record truly represent the trade-mark sought to be registered.

(Signed.) ———.

Sworn to and subscribed before me, a notary public, this ——— day of ———, 18 —.

[SEAL.]

———,
Notary Public.

NOTE.—The facsimile must be on a card 10 x 15 inches, with an inch margin all round; must be in black, of such character that photolithographic copies may be produced therefrom, and must be signed (within the margin at the bottom of the sheet) by the applicant or his attorney, and the signature attested by two witnesses.
